Sunny Acres Nursery
W. F. Christman, Manager

Catalog of
GLADIOLUS
and IRISES

ROBBINSDALE, MINNESOTA
WE take pleasure in presenting to you our 1926 catalogue of Gladiolus and Iris. We do not offer a lengthy list, but our catalogue will be found to contain a good selection of standard varieties, as well as some of the new originations in both the Gladiolus and the Iris.

It is our desire to be of service to our customers and we exert the utmost care in filling your orders to your entire satisfaction. Our aim is, every customer a satisfied customer, and from reports we have received, we feel that we are accomplishing our desire. We do not list any variety that has not been found to possess merit. To meet the demand we have listed the more moderate priced varieties. We are growing a number of novelties and new originations, including some of our own, which we will not list until we have further tested them to our satisfaction. Should you desire varieties not listed, please write us and we will be pleased to advise you whether or not we can supply them.

We have a large stock of peonies which includes the finest novelties as well as the more moderate priced ones. Our peony catalogue will be issued about June 1st.

We are also growing large numbers of perennial plants, including delphinium, pyrethrum, phlox, lupines, aquelegia, galliardia, correopsis, daisies in variety, gypsophila, etc. If you will send us a list of your requirements we will be pleased to quote you prices.

OUR SOIL, which is a rich sandy loam, produces vigorous, clean, healthy roots and bulbs, and SUNNY ACRES QUALITY has a real meaning. We use great care to see that our stock is always true to name, but should an error occur in filling an order it will be promptly and cheerfully rectified if called to our attention.
SUNNY ACRES NURSERY is located four miles Northwest of Minneapolis on the Jefferson Highway, which is the main artery of travel to that wonderful national playground, Minnesota's Northern Lake Country. Busses to and from Minneapolis pass our nursery at frequent intervals. When our acres of flowers are in bloom the sight is worthy a pause in your travels and visitors receive a hearty welcome. We are pleased to greet old friends and to meet personally those whom we have known through correspondence. Our Minneapolis and St. Paul friends will find it just a pleasant evening drive on a paved highway.

TERMS. Where credit relations have not yet been established with us, our terms are cash with order. Twelve plants or bulbs of any one variety will be sold at the price of ten. Prices quoted include packing and delivery.

We are members of the following societies:

The American Peony Society.
The American Iris Society.
The American Gladiolus Society.
The Northwestern Peony and Iris Society.

As to our responsibility we refer you to the Penn Avenue State Bank of Minneapolis, Minn. Any orders entrusted to us will have our prompt and careful personal attention.
GLADIOLUS

It is perhaps hardly necessary for us to say much by way of introduction in regard to the gladiolus either as a garden feature or as a cut flower. This flower has achieved such tremendous popularity in recent years that there is no over-supply although millions of bulbs are produced each year. Many of the varieties of ten or fifteen years ago are still popular because they possess real merit and beauty, while many of the new varieties are simply wonderful.

We have aimed to make our descriptions of varieties conservative and truthful. If much praise is given it is because it is merited. In a number of cases the originator’s descriptions have been given. The originator’s name is enclosed in parenthesis.

CULTURE

One reason for the popularity of the gladiolus is its ease of culture and the certainty of success if a few simple directions are followed.

Best results are secured in full exposure to the sun. Planting near foundations or in much shade is not advised. The ground next to foundations is usually too dry and of poor quality. A good fertilizer is pulverized sheep manure sprinkled over the surface after the bulbs are covered. Sometimes it is mixed with the soil below the bulb but this necessitates more work and there is a possibility that the fertilizing elements will be washed down below the reach of the roots, especially in light soil. Bone meal is another good fertilizer but is slower in action.

Plant the bulbs from four to six inches deep when the ground becomes warm. Planting at intervals of two weeks until about July 1st insures a succession of bloom.

In the early fall they should be dug and the tops removed close to the bulb. After they have dried, the roots and old bulb should be removed and the new stock kept in an airy, frost-proof place. Frozen bulbs are worthless so care must be exercised to prevent their damage in this manner.

Alethea (Kunderd). Purest deep canary yellow. Primulinus Hybrid. Lower petals deeper with light, golden throat lines. A very pure and beautiful yellow

Alice Tiplady (Kunderd). A grand, large Primulinus of most beautiful orange saffron color

Allen V. Bunce (Wm. H. Purple). Livid orange yellow with clear central lines of deep claret. (See cut)

America. Soft lavender pink; wide open flowers

Anna Eberius (Diener). Dark velvety purple; throat darker shade. Tall spike of large flowers

Arizona Rose (Kunderd). A very large flower of finest rose pink. Almost a self color

Attraction. Cardinal red, with creamy white throat. Very attractive

Each $1.50
Baron Hulot (Lemoine). Deep violet blue flowers; yellow lines on lower petals. The best of its color.......................... 10c
Bertrex (Austin). A pure, glistening white. Early and fine..... 10c
Bluejay. Bright, light blue with creamy white blotch on lower petals ............................................................... 20c
Butter Boy (Kunderd). An extra tall, strong plant producing giant bulbs. Large butter cup yellow flowers nicely placed on spike. A decidedly distinct, Primulinus variety of much merit........ 50c
Byron L. Smith (Kunderd). Lavender pink on white ground. Exceedingly fine as a cut flower. Color equal to a cattleya orchid ................................................................. 20c
Carmen Sylva (Prestgard). Pure snow white, throat slightly pencilled lilac. One of the finest new whites..................... 15c
Crimson Glow (Betcher). Brilliant crimson overlaid darker shade. Very large, open flowers........................................ 10c
E. J. Shaylor (Kunderd). Tall, very strong plant and large blooms. A beautiful, pure, deep rose pink.............................. 10c
Elaine (Wm. H. Purple). A beautiful lily white with faint lilac lines at the throat...................................................... $1.00
Elizabeth Tabor (Hinkle). Early light pink with maroon blotch in throat. Resembles Mrs. Frank Pendleton but larger and much earlier. Many blooms open at one time......................... 50c
Elora (Burbank). A beautiful early creamy white with red lines in throat. Large, wide open flowers.............................. 15c
Empress of India. A rich, dark maroon red; almost black........ 5c
Evaline. Violet over terra-cotta. An unusual color and much admired ................................................................. 5c
Evelyn Kirtland (Austin). Beautiful shade of rosy pink, darker at the edges fading to shell pink at the center. Brilliant scarlet blotches on lower petals. A splendid flower of outstanding quality ................................................................. 10c
Flora (Velthuys). Rich yellow. Large flower on strong spikes 10c
Giant Nymph (Coleman). La France pink with creamy yellow throat. Very large, wide open flowers. One of the best of recent introductions ......................................................... 35c
Gold (Hoeg). Pure golden yellow; throat deeper shade and slightly streaked. One of the best yellows.............................. 20c
Golden Measure (Kelway). Large, deep, golden yellow. A wonderful flower .......................................................... 15c
Halley (Velthuys). Large, salmon pink flowers. Very early. Always dependable.......................................................... 5c
Helen Franklin. White with lilac markings in the throat. A very good, ruffled variety.................................................. 10c
Ida Van (Kunderd). Large, open flowers solid, bright red to flaming pink with darker shade of red in lower petals........ 10c
Jean Dieulafoy. Very wide, creamy white flowers with maroon blotch in lower petals. Very attractive flower................. 10c
Jenny Lind (Hoeg). Pure, soft, apricot pink; throat pale yellow. Ruffled. One of the best.................................................. 30c
Le Marechal Foch (Van Deursen). Pure, delicate rosy pink. Large flower and very early.............................. 5c
OPALESCENT
Lilywhite. Fine, pure white. A popular, early white..................10c
Louise (Wright). Very fine lavender. Wine colored blotch in throat. Large, well opened flowers..................15c
Loveliness (Zee). Color soft cream, tinted pink. Large and fine.
   Very desirable..................10c
Maiden's Blush (Gruellmans). Dainty, flesh pink Primulinus hybrid.
   Fine for cutting..............................10c
Maine (Vos). White with faint lavender lines in throat. One of the best white varieties..................50c
Mary Pickford (Kunderd). Delicate creamy white; throat finest sulphur yellow. A beauty..............................15c
Ming Toy (Kunderd). Very large flower of finest form. Showy
depth buff yellow..............................50c
Miss Spokane (Kunderd). Giant plant and very strong grower.
   Large flowers of salmon color, slightly deeper in throat. Six
   or more flowers open at a time..................25c
Mona Lisa (Kunderd). Palest, soft rose pink, ruffled. A magnifi-
cent, almost pure self color..........................15c
Mr. Mark (Velthuys). Light blue with reddish blotch in throat.
   Very fine..............................25c
Mrs. Dr. Norton (Kunderd). Creamy white, tinted pink, becoming
darker at the edges. A universal favorite and worthy of its
   popularity..............................10c
Mrs. H. E. Bothin (Diener). Light geranium pink; flame scarlet
   center. Strong, well built spikes. One of the loveliest combi-
nations in gladiolus. (Heavily ruffled)..................25c
Mrs. Francis King (Coblentz). Flame scarlet. Large flowers. An
   old favorite retaining its popularity..................5c
Mrs. Frank Pendleton (Kunderd). Bright rose pink on pure white
   ground. A giant blotch of richest carmine red on lower
   petals. Very desirable..........................10c
Mrs. John R. Walsh (Diener). Heavily ruffled flesh pink. Three
   lower petals of flame shading into dark ruby at the throat. A
   magnificent variety..........................50c
Mrs. Richard Lohrmann (Diener). Creamy shell pink with pale
   yellow lip, a color rivaling the finest orchid. Flowers are very
   large and heavily ruffled. Long, sturdy spikes........$1.00
Mrs. Watt. American beauty self color. Very pretty..................10c
Mrs. W. E. Fryer. Orange scarlet. Very showy..........................10c
Muriel. One of the loveliest of the light blues. Flowers large with
   small, dark violet spot in throat..................25c
Myra (Kunderd). Giant flowered Prim. hybrid. Deep salmon
   over yellow ground; yellow throat with pink lines. Tall, slen-
der stem. Exquisite..............................5c
Niagara (Banning). A light creamy yellow, sometimes mottled
   light pink..................................10c
Opalescent (Wm. H. Purple). Wonderful spikes of very large,
   pale rose lavender. A pure self color with soft lilac throat
   lines. A vigorous grower with excellent foliage and strong,
   straight, bloom stalks. (See cut)..................50c
**Orange Glory** (Kunderd). Grand orange colored with beautiful lighter throat. Very rich and striking color. Ruffled........10c

**Panama** (Banning). Fine large pink. Darker shade than America of which it is a seedling..................................................5c

**Peace** (Groff). A late, pure white with Tyrian rose blotch on lower petals. Very tall, straight spikes.........................................5c

**Pink Wonder** (Kemp). La France pink shading to a pale pink throat. Base of lower petals feathered with rose on yellow ground ..........................................................20c

**Pride of Lancaster** (Kunderd). A brilliant orange salmon with rich, deeper orange throat. Beautifully ruffled...............15c

**Prince of Wales** (Van Zantern). An improvement on Halley. A beautiful, early, salmon pink..............................................10c

**Purple Glory** (Kunderd). Deepest, velvety maroon red, with almost black blotches. Beautifully ruffled. While not a purple, this is a beautiful variety and a strong grower...............25c

**Red Emperor** (Groff). Large, deep scarlet flowers. Large, strong spike. Very fine.................................................................15c

**Richard Diener** (Diener). Pure geranium pink with a slight sprinkling of ruby on creamy yellow center. Large flaring blossoms, rivaling an orchid in beauty.........................50c

**Rose Ash** (Diener). Corinthian red, shading into ashes of roses on the outer edges..........................................................25c

**Rosella**. Large, light rose color. Wide open flowers with white throat. Very pretty...............................................................10c

**Salmon Beauty** (Kunderd). Very large flowered Primulinus. Deep salmon with rich salmon throat..............................15c

**Schwaben** (Pfitzer). Delicate pale yellow with a maroon blotch. Flowers closely set on stem..............................................5c

**Shakopee** (Kenning). Salmon pink; salmon blotch on yellow ground with plum colored mark in the center. A distinct and beautiful flower. A new origination...........................................25c

**Sheila** (Coleman). Wonderful blooms of rich salmon. Very early .................................................................20c

**Souvenir** (Gravereau). Pure, golden yellow Primulinus. Flower small but a very attractive color. One of the best of the Prims .................................................................25c

**Starlight** (Wm. H. Purple). Early, extra strong Primulinus hybrid. Wonderful, strong spikes of ruffled cream flowers with radiant lines of pomegranate on wax yellow throat. Received special award of merit by the American Gladiolus Society in 1924. See cut .................................................................50c

**Thomas T. Kent** (Diener). Shell pink, overlaid with strawberry. Crimson streak on each petal. Tall, vigorous spikes...........25c

**Tycko Zang** (Austin). A beautiful shade of clear, salmon pink with a brilliance unsurpassed, and possibly unequalled under electric light. Individual petals very broad and of good substance. A good propagator. Mrs. Austin has originated some fine varieties of glads and we think this one of the very best. Has broad, heavy foliage and produces wonderful large bloom from small bulbs ..............................................$3.00
**Vanity** (Wm. H. Purple). Delicate La France pink flushed over cream ground. Very large flowers of airy graceful type. Petals slightly ruffled (See cut)........................................35c

**War** (Groff). Deep, blood red shaded crimson black; very tall and conspicuous. Wide open flowers and one of the best late reds ..........................................................10c

**W. E. Fryer** (Kunderd). Very large, massive. deep violet. Beautiful throat. Extra fine..................................................35c

**White Wonder** (Kemp). Almost pure white; faintly flaked rose pink. Large flower ..................................................15c

**Yellow Hammer** (Gruellmans). Large, beautiful yellow. Strong grower ........................................................................10c

**Sunny Acres Mixture.** A very good mixture of named varieties that will surely please you. You will be assured of a wide range in color and a long season of bloom. Try a few dozen.

Per dozen ...........................................................................50c

Selected mixed Primulinus hybrids. Per dozen.................50c

Please bear in mind that prices we have quoted above include delivery and packing charges.

If you are now growing gladiolus we trust you will find some varieties in our list that you will decide to add to your collection. If you are not now growing this beautiful flower, do not let another year pass without sharing the joy that others experience in their possession. Plant at least a few and you will want to add more as years pass and their real worth is established in your own garden. The period of bloom can be extended over several weeks by successive plantings, thus prolonging the season of enjoyment and affording continued delight as new varieties make their appearance.

While we feel we have an ample stock of most of the varieties listed, on a few of the newer varieties our stock is limited and all quotations are made subject to prior sale. We would advise early orders which will be shipped whenever they are desired or when weather conditions warrant.

**IRIS**

The iris has sprung into popularity in recent years, largely through the activities and exhibits sponsored by The American Iris Society. Many new, improved varieties have been brought out by a few, earnest hybridizers, both in Europe and America.

Many of the new foreign varieties are of doubtful hardiness in our severe Northwest climate and are conspicuous by their absence in our catalogue. It is our experience that a winter mulch is beneficial, especially the first winter.

So far we have fortunately had no experience with the iris borer, which has been troublesome in some sections, and we shall maintain a close inspection of all plants purchased by us to prevent, if possible, its entrance into our plantings.

We have placed the names of originators in parenthesis immediately following the name of variety. In the few instances where they are absent they are unknown to us or the plant is an original species.
The figures on the extreme left are the ratings of the American Iris Society on a scale of 1 to 10. Any variety rated higher than 60 is good and worthy to grow. Where ratings are absent, the variety has not yet been rated.

The prices quoted cover packing and delivery charges.

The iris is of easiest culture. Soil seems to be unimportant as they do well in either a clay or lighter soil. The soil, if well enriched induces strong foliage. The rhizome, or thickened root, should be planted slightly below the surface of the ground. Press the dirt firmly about the rootlets to hold the plant in place. New rootlets will soon form.

Heavy fertilization induces disease. See that there is good drainage in your iris bed and that they are well cultivated and kept free from weeds.

8.3 Afterglow (Sturtevant). Misty lavender, lit with yellow at the center .................................................. $1.00
7.8 Amas. Standards rich blue; falls violet. Early, large flowered species .............................................. 35c
8.4 Anna Farr (Farr). Beautiful white iris of splendid form and substance, the standards and falls delicately margined pale blue ................................................................. $1.50
7.7 Anne Leslie (Sturtevant). Rose tinted standards and dahlia carmine falls ........................................... $1.00
7.4 Aurea (Jacques). Clear chrome-yellow in standards and falls .......................................................... 25c
9.4 Ballerine (Vilmorin). Standards light violet blue, falls deeper, splendidly formed, large fragrant flower of Amas type. borne on tall, slender branching stems ....................... $2.00
7.2 Bluet (Sturtevant). Of an appealing blue tone and neat habit .............................................................. $1.00
7.5 Caprice. Rosy red standards and falls. Dependable, thrifty grower, very pleasing fragrance .................... 25c

Cecil Minturn (Farr). Uniform shade of cattleya-rose. Large dome shaped flower. Pink effect ......................... $2.00
7.1 Celeste (Lemon). Pale azure blue ........................................... 25c
7.4 Dr. Bernice. Standards bronze, falls crimson. A rich combination of colors ......................................... 25c
8.5 Dream (Sturtevant). A pink pallida. Very popular ........ $2.00
8.6 Edouard Michel (Verdier). Rosy red, somewhat similar to Caprice, but a larger and better flower ............. $1.00
7.8 Eldorado (Vilmorin). A blending of bronze, yellow and heliotrope. Distinct and pretty ......................... 50c
8.0 Fairy (Kennicott). White suffused light blue. A small dainty flower, growing on tall stems. Very fragrant and desirable ................................................................. 25c
6.5 Gertrude (Peterson). Falls and standards violet-blue. Free flowering, rated too low .................................. 25c

**Siberian**. Small deep blue flowers with grass-like foliage........ 15c

**Foliosa**. Beautiful blue flowers hidden down in the foliage on six inch stems .............................................................. 25c

---

Thou art the iris, fair among the fairest,
   Who, armed with golden rod
And winged with the celestial azure, bearest
   The message of some God.

O lower-de-luce, bloom on, and let the river
   Linger to kiss thy feet!
O flower of song, bloom on, and make forever
   The world more fair and sweet.

*Longfellow.*
